# COMPANY PROFILE

## Our Values

*Dedication to work, quality assurance and timely completions of assigned jobs are our core worth.*

## Our Vision

*To be one of the best company in the region in terms of quality, productivity and innovation in our service delivery*

## Our Mission

*To delight our clients by providing consistent high quality and high-value technical services that exceed their expectations.*

# About Us?

---

*We use this environmental expertise on a bespoke basis to maximize environmental and economic sustainability and to design in accessibility for all sections of society. These enhance the role buildings play in sustainable local communities. In summary, we believe our commercial engineering approach and passion for delivering the highest levels of customer service sets us apart from other consultants and consistently delivers considerable added value to any project.*

*Flex Engineering Services is a registered Engineering Services Company established in 2003 by a team of highly qualified, experienced and dedicated Engineers. Flex Engineering provides a strategic, flexible, experienced and innovative approach to delivering engineering, technical support and management consultancy services for its clients.*

*We have a proven track record in delivering client projects to the most demanding of timescales, within budget and with the lowest possible client risk. This specialist expertise and experience gives our clients the confidence and peace of mind from the outset that their project is in the best possible hands. All our projects are led by a highly experienced Director and a team with a passion for delivering high quality commercial engineering solutions alongside an excellent level of service. As part of this approach, we focus on designing out systems rather than designing in complex and expensive kit and in seeking to balance the up-front capital cost of equipment and services against the associated life cycle costs of operating the building and provide options based on specific commercial requirements. Our approach embodies the maximum possible contribution from each of the three pillars of environmental, economic and social sustainability.*

*At Flex Engineering, we pride ourselves in the provision of high quality and high value services to the utmost satisfaction of our clients. We offer the following services:*

## Our Services

---

### Civil Engineering

*We provide all services in the field of building construction on the national and international level. Planning, site supervision, structural design, building physics and project monitoring, excavation, trenching, sand removal, and backfilling*

### Mechanical Engineering

*We offer computer aided engineering, engineering design and detailing, product design and development, value engineering and value analysis and engineering documentation,*

### Piping Engineering

*We offer you a complete choice of services which include piping stress analysis service, architectural piping engineering service and industrial pipeline engineering services and inspection*

# Our Services

---

## Instrumentation and Electrical Engineering

*Our Instrumentation and Electrical engineering services include Design, construction and testing of electrical switchboards, marshalling cabinets, control cabinets and industrial process automation systems, on-site construction of electrical and instrumentation facilities, end-to-end testing, calibration and adjustment, and commissioning, and technical assistance to operation and maintenance staff.*

## Transportation and Heavy Equipment Rental

*We guarantee profound engineering competence, new technologies and a clear understanding of mobility requirements for an efficient transport infrastructure and reliable heavy equipment rental services.*

## Environmental and Waste Management

*We advise you on methods to manage your environment and waste more cost effectively and efficiently. Our comprehensive waste services include the pre-treatment, intermediate storage and reconditioning of dangerous industrial waste products. To reduce waste disposal, we are constantly investigating ways to recycle and reuse materials to avoid contributing to landfill.*

## Condition Monitoring

*We supply, use and recommend a wide range of advanced diagnostic tools, techniques and strategies to identify and resolve issues of equipment reliability such as ultrasonic testing, lubrication analysis, laser alignment, vibration / stress wave analysis, machine balancing, online machinery monitoring (hardwired or wireless), machinery health management, infrared thermography, wireless remote thermal video monitoring, and endoscope inspections.*

# Our Services

## ***Supply of Injection Skids and Associated Services***

*We deliver a complete design and engineered instrumentation package to meet the control and monitoring requirements of wellhead applications.*

## *Supply of Industrial Equipment and Spare Parts*

*We help you minimize facility and equipment downtime with our cost-effective spare parts and services to ensure the best possible accessibility and continuous trouble-free operation of your equipment.*

## *Supply of Chemicals*

*We provide a wide array of chemical distribution services, customized to your specific needs. We are a supply top-grade bulk, packaged goods, customized blends and factory-packed solutions for our customers in numerous industries, focusing on their end-user accounts. From a fully equipped lab to an in-house fleet, we have the resources to address your diverse chemical distribution needs*

*Our in-house wellhead domain knowledge coupled with our excellent vendor relationships enables us to deliver projects within industry shortest lead time while striving for a lower Total Cost of Ownership (TCO) for our customers*

# Our Services

## Asset Management

*Our asset and plant optimization services can help you proactively manage your enterprise challenges, or let us manage them for you. Our comprehensive, data-driven solutions can have a dramatic and escalating impact on your Maintenance and Repair Operations cost, productivity, and bottom line. In addition, we provide complete package of service related to asset registration and CMMS implementation*

*Covering multiple vendors, the solution provides a fast and accurate spare parts delivery service, ensuring that spare parts are delivered to the right place in the right time and at the right cost.*

## Spare Parts Management

*Our Spare Parts Management Service solution includes consolidated order processing, reliable spare parts supply, scientific inventory management, first-class logistics network and professional service management.*

## Maintenance and Asset Integrity

*We deliver an established range of innovative and risk-based asset integrity services within the oil and gas industry. Our integrity techniques are international code compliant and practiced across a range of countries. Our asset integrity services can be effectively implemented at any stage of an asset's life cycle and have been proven to drive down inspection, maintenance and repair costs whilst improving plant reliability and operational safety.*
